

Please reject the NAB's petition 04-160.
I'm a salesman and drive for a living. Since XM Instant Traffic and Weather has been available it has provided me with a wealth of knowledge on traffic conditions and weather prior to leaving the office.

Living in the Northeast I travel from Harrisburg to New York, Philadelphia, Baltimore, Washington on a daily basis. With the construction delays and bad winters we have in the Northeast, XM brings me those conditions for the citys before I even enter that citys airwaves. This is something that other radio stations do not offer and with the XM I don't have to worry about travling beyond the signal and missing the good content I was waiting for.
